# DOCUMENT CAPTURE ...

Scan your documents...

## TO OPTIMISE THEIR MANAGEMENT !

Digitisation satisfies a need for simplification and modernisation of information exchange processes in companies. There are several objectives:

- Favouring circulation of information electronically
- Making departments interactive and more reactive
- Managing departments more efficiently
- Protecting the environment
- Making documents usable in time
- Protecting our cultural heritage
- etc.

Spigraph has the skills and range of products to meet all the different issues raised by document digitisation.

Spigraph...

## OUR SKILLS WORKING FOR YOUR BUSINESS!

### The distribution business

As a specialist value-added distributor, Spigraph markets and distributes all types of scanners in Europe and Africa through its network of dealers and high performance logistics platforms.

### Masters of the ranges

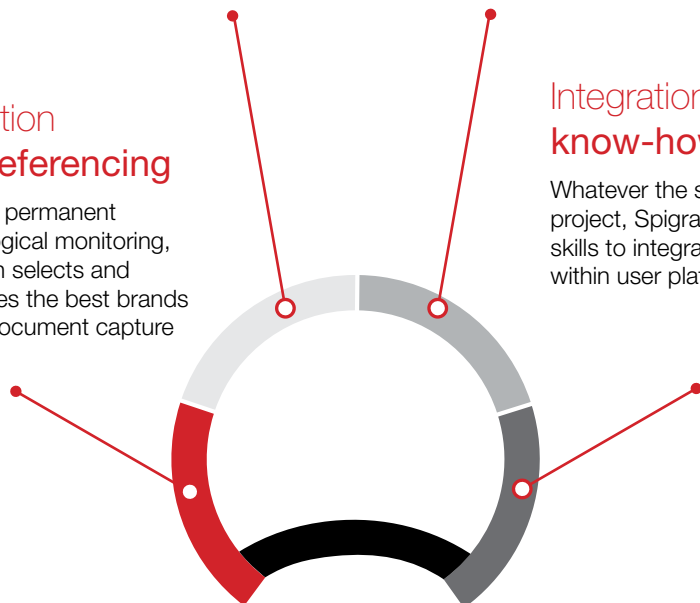

Our close relationships with manufacturers and follow up on projects upstream and downstream gives Spigraph expertise in all ranges and allows us to offer the most appropriate solutions.

### Selection and referencing

Through permanent technological monitoring, Spigraph selects and references the best brands on the document capture market.

### Integration know-how

Whatever the scale of the project, Spigraph has the skills to integrate solutions within user platforms.

## PROJECTS STEERING

With 15 years' experience, Spigraph assists its partners in value-added digitisation projects. Tailoring solutions to the specificity and complexity of each user's needs, Spigraph makes available its complementary development and integration skills to accompany the setting up of projects.

« Our job is to devise, design and set up a digitisation solution with you. »

Member of the digital professionals' network

... an issue for all businesses !
